Vice vs. Vise

The words vice and vise are homophones, two or more words having the same pronunciation but different meanings, origins, or spelling, which are often confusing to some because they not only sound alike but they also have similar spellings. However, these terms actually have different meanings and should be distinguished from each other. This post will help you identify this difference so you may be able to use them correctly in your writing.

The word vice is commonly used as a noun referring to “moral depravity or corruption,” “a habitual and usually trivial defect or shortcoming” or “criminal activities involving prostitution, pornography, or drugs.”
